

It started with single cross corn; it has dominated the pork and poultry production, the USDA conservation department have released **HYBRID** game fish, and now the car companies are promoting **HYBRIDS**.

All for the *same* reasons; there are **ADVANTAGES** in **HYBRIDS!**

Since 2006 we have been telling you, now let's hear from our customers!

“ Lynwood Partnership of Gollan NSW has been experimenting with blended genetics with it's commercial EU accredited herd of cattle for a number of years. Being successful purchasers for two years, some of the results from the Simm-Angus hybrids are starting to reveal dividends.

At the Prime Stock Sale in Dubbo on Thursday May 6th, a pen of Black Steers derived from Circle 8 genetics was consigned to Cargill Beef Australia for 186.8 c/kg the milk tooth steers came back off the scales at 520.3kg per head grossing \$971.92 per head. These cattle were run on Lucerne dominant improved pastures along with winter cereal crop. Zero HGP and no supplementary grain.

The vendors "Tonkins Family" of Lynwood, Gollan were well pleased with the result. "There was a lot of talk at the sale as to how the cattle could not possibly all still have their baby teeth.

Tonkins Family - Wellington NSW. ”

“ I have been buying Sim-Angus hybrid bulls from Circle 8 since 2006. Our clients have used them with great success in the New England area. I have found the Cooper's excellent to deal with, both professional and responsible. We believe that the Sim-Angus hybrid with the Black Simmental injection has a role to play in the New England across many herds. Our clients have been impressed with the weight of their calves at weaning and the milk and fertility of the female progeny retained as breeders, whilst retaining a black hide. If you're in the market for a Sim-Angus hybrid, then I can certainly recommend the Circle 8 genetics. ”

Andrew Starr - Principal - Ray White Rural Guyra/Armidale

“ As agents we are employed to find the best available money for our clients' livestock. Using a Circle 8 Sim-Angus Hybrid bull makes our job a lot easier. The client feedback I've received regarding the weight for age and do-ability of

Circle 8 sired calves is astounding. The Coopers know how to breed cattle so that you, the producer, get the full benefit of the programme relating to Hybrid Vigour and putting more shape and punch into your calves. There is definitely a \$\$\$ per head advantage to using these bulls ”

Landmark Operations Ltd*

“ On the 20.02.2010 Circle 8 offered a pen of Angus cows nursing eight week old Sim-Angus Hybrid sired calves at the Moss Vale Livestock exchange. They achieved a saleyard record price of \$1480.00 per head.

The Circle eight cows were the best line of cows I have ever seen! Magnificent cows that you could do anything with. Their Sim-Angus calves were outstanding! ”
